# Lab Assignment 1 CSE-110

Name: Jonathan Hunter

Course: ECE-110 Software Engineering

Assignment: Lab 1

Tool:  VScode, Github

**Part 1:** Installing Visual Studio Code and Extensions

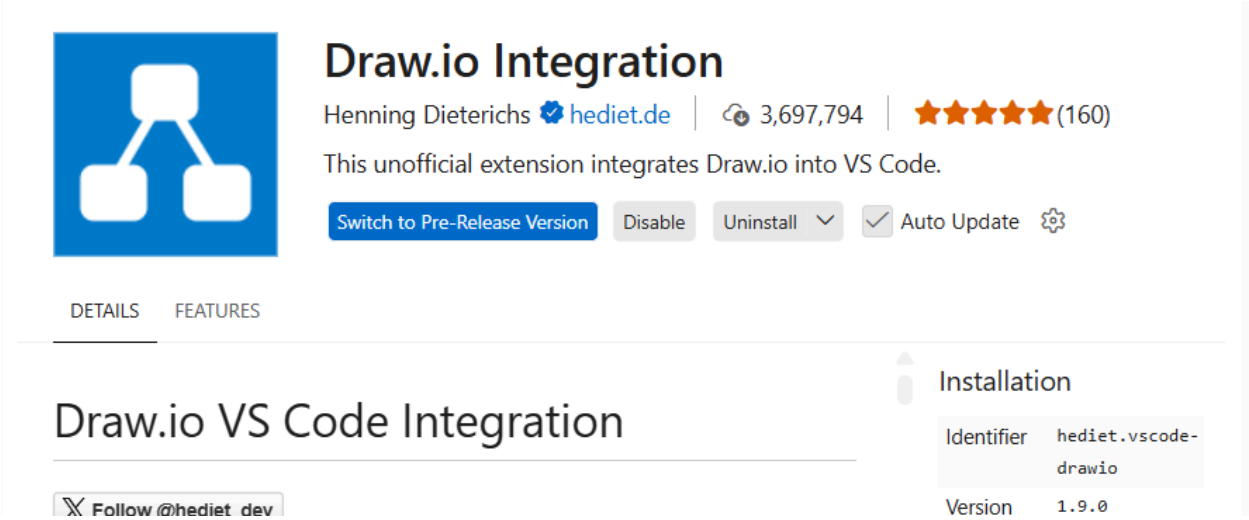

**Figure 1:** Installation Draw.io

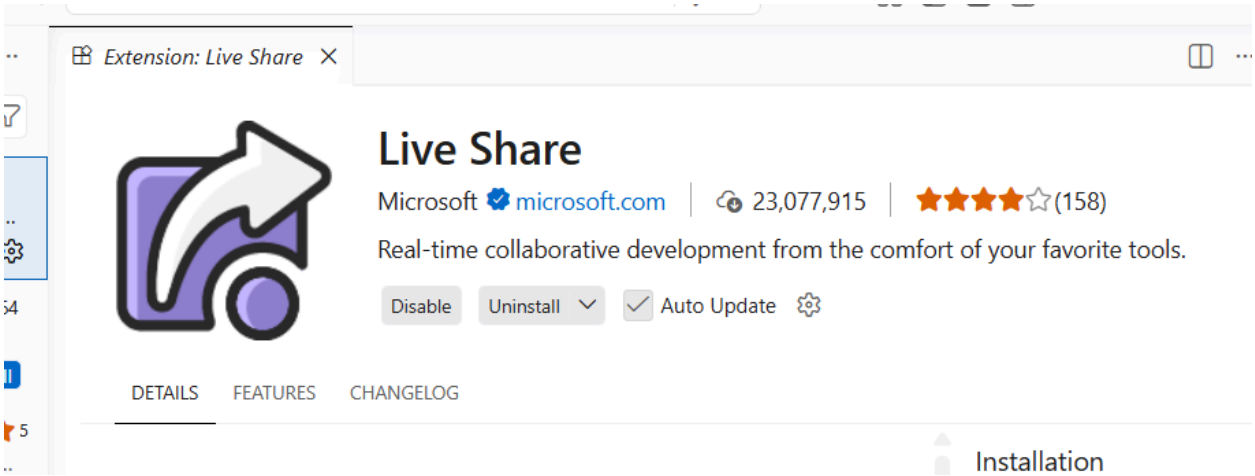

**Figure 2:** Installation LiveShare

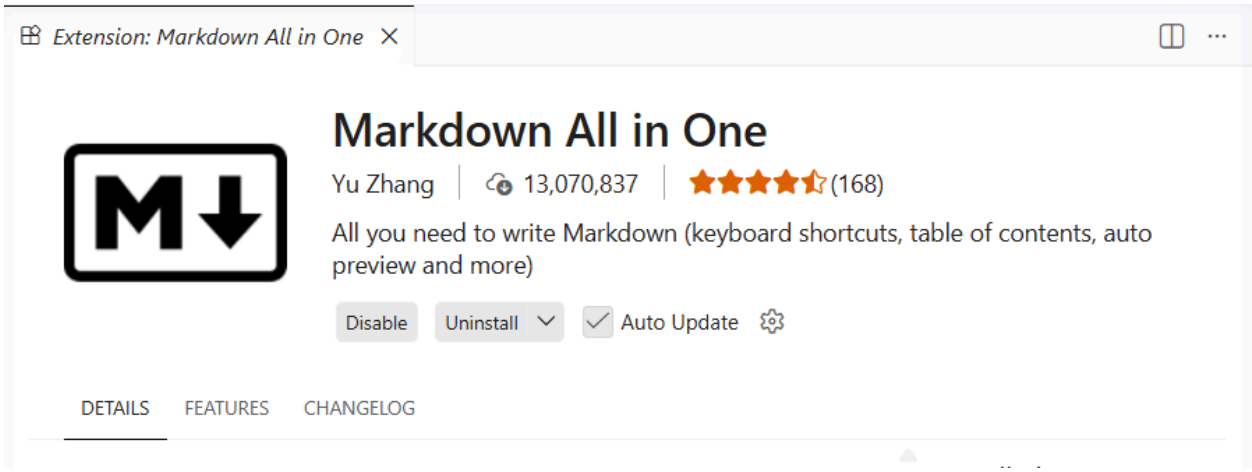

**Figure 3:** Installation Markdown All In One

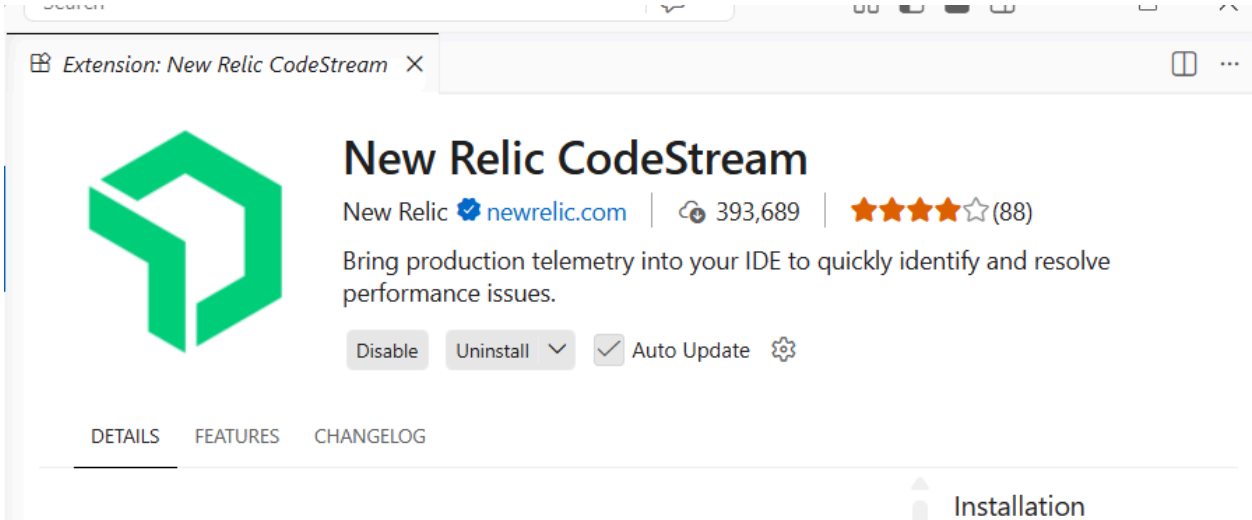

**Figure 4:** Installation CodeStream

**Part 2:** (Re)Familiarizing Ourselves with Git

Command Line

1. clone the repository onto your local machine using the command line.

```
jurizar@its-cseb240-24 MINGW64 /c/Users/jurizar
$ git clone https://github.com/ItsStressful/CSE110---Lab1.git
fatal: destination path 'CSE110---Lab1' already exists and is not an empty directory.
```

2. cd into the repo folder and create a new git branch called "add-read-me" and checkout that branch into your local repository.

```
jurizar@its-cseb240-24 MINGW64 /c/Users/jurizar
$ cd CSE110---Lab1/
```

```
jurizar@its-cseb240-24 MINGW64 /c/Users/jurizar/CSE110---Lab1 (main)
$ git branch add-read-me
```

3. N/A
4. add the new file to git.

```
jurizar@its-cseb240-24 MINGW64 /c/Users/jurizar/CSE110---Lab1 (add-read-me)
$ git add README.md
```

5. commit the files with the commit message "Update readme file".

```
jurizar@its-cseb240-24 MINGW64 /c/Users/jurizar/CSE110---Lab1 (add-read-me)
$ git commit -m "Update readme file"
On branch add-read-me
```

6. push the commit to the remote branch. (You may need to use the set-upstream flag if you created the branch locally).

```
jurizar@its-cseb240-24 MINGW64 /c/Users/jurizar/CSE110---Lab1 (add-read-me)
$ git push --set-upstream-to origin
add-read-me   HEAD          main          origin/HEAD   origin/main …
    -o, --[no-]push-option <server-specific>
                           option to transmit
    -4, --ipv4             use IPv4 addresses only
    -6, --ipv6             use IPv6 addresses only
```
